Gabonese Extension of the Vandji Play Confirmed

In the Republic of Gabon, the well ONAL 3 drilled in the central area of the exploration license of Omoyueyi has intersected 139 meters of oil impregnated formations corresponding to 112 meters vertically.

This reservoir encountered in the Basal Sandstones ("Grés de Base") corresponds to the Vandji sandstones in Congo.

A production test will be performed over a two week period in order to evaluate the reservoirs productivity, with and without pumping. A delineation well located 3 km away from ONAL 3 will be performed as soon as the drilling rig will become available.

Maurel & Prom is listed on Eurolist d'Euronext Paris – compartiment A - CAC mid 100 Indice
